

Reset configuration

If you need to reset the configuration you have to go to the Administration > Configuration > Setup button.

The screenshot shows the JIRA Administration interface. At the top, there is a search bar and navigation tabs: Applications, Projects, Issues, Add-ons (highlighted with a red box and number 1), User management, and System. On the left sidebar, under 'ATLASSIAN MARKETPLACE', there are links for 'Find new add-ons' and 'Manage add-ons'. Below that, under 'JIRAFFE', there is a 'Configuration' link (highlighted with a red box and number 2) and links for 'Projects' and 'Badges'. The main content area is titled 'Configuration' and has tabs for 'Abilities' and 'Rules'. Below the tabs, there is a text description and a '+ Add ability' button. A table lists the current configuration items:

#	Name	Enabled	Action
	Admin	<input checked="" type="checkbox"/>	Remove

In the top right corner of the main content area, there is a gear icon (highlighted with a red box and number 3) representing the Setup button.

In this view, you can reset and all the customized rules, abilities and badges will be lost.

The screenshot shows a 'Setup' dialog box with the following content:

It is necessary that everything should be **OK**

Task	Status	Actions
Images directory The directory where you'll upload the images of the abilities and badges	OK	Reset
Abilities and rules Basic abilities and all the rules should be created	OK	Reset
Badges You should have the basic badges	OK	Reset

At the bottom right of the dialog box, there is a 'Close' button.
