How to reset manually Jiraffe
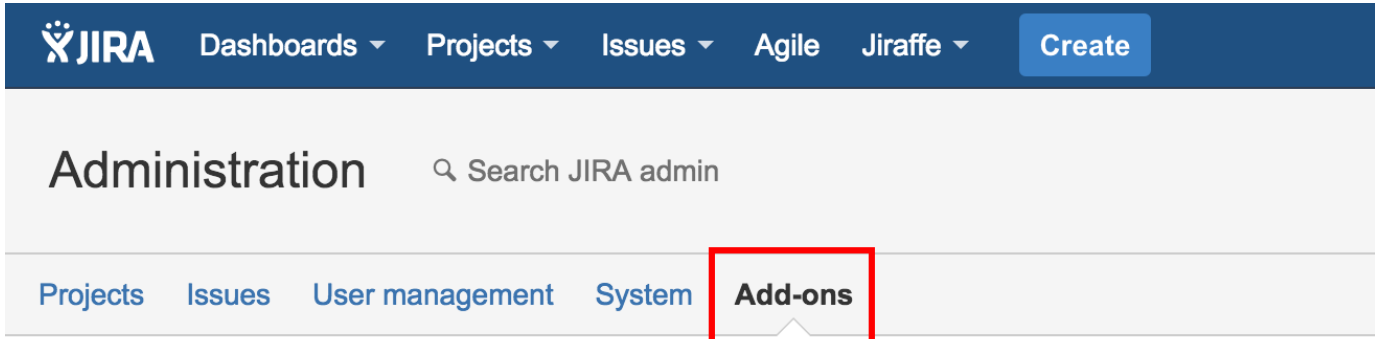

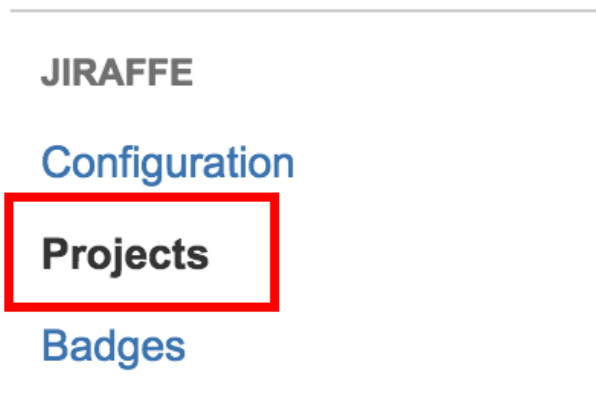

How to reset Jiraffe addon manually

All this instruction you can do with Jira running.

1. Execute jiraffe-reset-mysql.sql in your mysql or the file jiraffe-reset-postgres.sql in your postgress.
2. Remove the directory /var/atlassian/application-data/jira/data/jiraffe/
3. Extract the jiraffe-data.zip in the directory /var/atlassian/application-data/jira/data
4. Go to the Jiraffe administration

In the administration projects

5. Enable only one project

6. Go to the user's adventures

	Adventure	Theme	Points	Level
	sample	pirate	0	1

You have to see only one project with 0 points

7. Go inside of this project and go to the historial

All adventures / sample
Adventure sample

Sir Edward Teach

Points: 0 (500 to level up)
Level: 1
Team: 1

Historial

Date	Rules	Points
		•••

You have to see something like this

All adventures / sample / History
History

Date	User	Rules	Ability	Issue	Points

« Prev 1 Next »

8. Create a new issue in this project and validate if you have points.

Your Users Adventures

	Adventure	Theme	Points	Level
	sample	pirate	4	1

Sir Edward Teach

Points: 4 **(496 to level up)**

Level: 1

Team: 1
